

NATHAN AIRCHIME INC. (A MEMBER OF MICROPRECISION GROUP)
1102 WINDHAM ROAD, PO BOX 96, SOUTH WINDHAM, CT 06266, USA

MODEL HBP-110, HEATED BASE PAD

FIT ALL NATHAN AIRCHIME K & P SERIES LOCOMOTIVE AIR HORNS

- Prevent intermittent horns failure due to ice and snow build up during winter months, when operating horns at restricted flow or low air pressure for low sound output.
- Simple and quick installation. Universal fit for all locomotive horn mounting manifolds (bases) of four 1/2" holes on 3.00" bolt circle diameter.
- Most economical way to heat locomotive air horns which prone to fail when moisture in the air line condense and freeze up at base blocking air passage.
- Heater is sealed and water proof. Functional even temporarily submerged in water.

Capacity:	60 watts
Voltage:	110V AC or DC (other voltages available)
Current:	0.55 Amp
Lead length:	500 mm [20 inch] 22 AWG
Wire protection:	Stainless steel armor flexible conduit
Finish:	Black anodized
Degree of Protection:	IP 66
Basic Dimension:	101 mm round x 18 mm thick [4" x 0.7"]
Net Weight:	0.5 kg [1 lbs]
